
BUSINESS REQUIREMENTS DOCUMENT

LOAN APPLICATION

Domain: FinTech

Created: June 13, 2026

Generated By: BRD Forge (Intelligent Multi-Modal Agent)

Author Team: Useless AI

1. Executive Summary

The Loan Application project aims to streamline the SME lending process by integrating secure authentication, ensuring compliance, and enhancing risk management.

2. Project Objectives

1. Enable seamless customer application submission with mandatory KYC document upload.
2. Implement robust name mismatch detection between GST and bank documents.
3. Ensure high-value applications undergo risk approval before offer generation.
4. Maintain comprehensive audit history for all reviewer actions.
5. Generate Business Requirements Document (BRD) with traceability and confidence metrics.

3. Scope Description

In-Scope Items:

- Customer application submission process
- KYC document management
- Name mismatch detection
- Risk approval workflow
- Audit history tracking

Out-of-Scope Items:

- Non-SME lending processes
- Third-party integrations not related to SSO

4. Key Stakeholders

- Product Council
- Risk Office
- Operations
- Legal
- Compliance

5. Functional Requirements

ID	Title	Description	Source	Meta
FR-001	Customer Application Submission	Customer cannot submit an application until mandatory KYC documents are uploaded.	securepay_stakeholder_memo.docx	Conf: LOW Pri: MUST HAVE
FR-002	Name Mismatch Detection	System must detect and flag name mismatch between GST certificate and bank statement.	securepay_stakeholder_memo.docx	Conf: HIGH Pri: MUST HAVE
FR-003	Risk Approval for High-Value Applications	Risk approver must approve applications above INR 25 lakh before offer generation.	securepay_stakeholder_memo.docx	Conf: HIGH Pri: MUST HAVE
FR-004	Audit History Visibility	Every reviewer action and document download must be visible in audit history.	securepay_stakeholder_memo.docx	Conf: MEDIUM Pri: MUST HAVE
FR-005	BRD Generation Requirements	Generated BRD must include source trace and confidence for each requirement.	securepay_stakeholder_memo.docx	Conf: HIGH Pri: SHOULD HAVE

6. Non-Functional Requirements

ID	Title	Description	Source	Confidence
NFR-001	Document Retention	Document retention for seven years with immutable audit logs.	securepay_stakeholder_memo.docx	HIGH
NFR-002	Sanction Letter Blocking	Sanction letters blocked until KYC, bank statements, and manual approvals are complete.	securepay_stakeholder_memo.docx	HIGH
NFR-003	SSO Vendor Review	SSO vendor review will be completed in a timely manner.	securepay_stakeholder_memo.docx	MEDIUM

7. Assumptions & Dependencies

- SSO vendor review will be completed in a timely manner.
- BigQuery will store either full BRD JSON or analytics-ready requirement facts.

8. Risks & Mitigations

Risk Element	Suggested Mitigation Strategy
Delay in SSO vendor review could impact project timeline.	Engage with vendors early and set clear deadlines.
Inaccurate name mismatch detection could lead to compliance issues.	Implement thorough testing and validation processes.

9. Acceptance Criteria

- All mandatory KYC documents must be uploaded before application submission.
- Name mismatches between GST and bank documents must be flagged.
- Applications above INR 25 lakh must receive risk approval before proceeding.
- Audit history must capture all reviewer actions and document downloads.
