1. Executive Summary

The payment app project aims to deliver a secure and compliant payment platform with robust authentication and real-time transaction capabilities. The app will ensure adherence to security policies and industry standards while providing a seamless user experience.

2. Project Objectives

1. Implement secure authentication methods.
2. Ensure compliance with PCI-DSS standards.
3. Provide real-time balance updates.
4. Enable export of Business Requirement Documents.
5. Establish a reliable notification system for transactions.

3. Scope Description

In-Scope Items:

- Username and password authentication.
- Two-factor authentication via SMS.
- Real-time balance updates using sockets.
- Export functionality for Business Requirement Documents.
- SMS and Email alerts for transactions.

Out-of-Scope Items:

- Integration with third-party SSO providers.
- Non-compliant data retention policies.

4. Key Stakeholders

- Security team

5. Functional Requirements

ID	Title	Description	Source	Meta
FR-001	Authentication Method	All authentication must use username + password only.	Pasted Notes.txt	Conf: HIGH Pri: MUST HAVE ■■ CONFLICT
FR-002	Two Factor Authentication	Two factor authentication via SMS is mandatory.	Pasted Notes.txt	Conf: HIGH Pri: MUST HAVE ■■ CONFLICT
FR-003	Real-time Balance Updates	The system should update the balance every 5 seconds using sockets.	secure_pay_wireframe.png	Conf: LOW Pri: MUST HAVE
FR-004	Export Functionality	The system should allow exporting of Business Requirement Documents.	secure_pay_wireframe.png	Conf: HIGH Pri: SHOULD HAVE
FR-005	Notification System	The system should send SMS and Email alerts for transactions above a certain amount.	secure_pay_wireframe.png	Conf: MEDIUM Pri: SHOULD HAVE

6. Non-Functional Requirements

ID	Title	Description	Source	Confidence
NFR-001	Security Compliance	The system must comply with PCI-DSS standards.	secure_pay_wireframe.png	LOW
NFR-002	Data Retention Policy	The system should retain audit records for 7 years.	secure_pay_wireframe.png	HIGH

7. Assumptions & Dependencies

No assumptions specified.

8. Risks & Mitigations

Risk Element	Suggested Mitigation Strategy
Potential conflict between authentication methods.	Review security policies and align authentication methods.

9. Acceptance Criteria

- Successful authentication using username and password.
- Two-factor authentication via SMS is operational.
- Real-time balance updates occur every 5 seconds.
- Business Requirement Documents can be exported.
- SMS and Email alerts are sent for transactions above the threshold.
